

PRACTICAL COURSE WORKBOOK

AI's Impact on Work & Society

Evaluate technology decisions with evidence and accountability

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented risk and impact assessment
SKILLS	Future of work, Automation, Inequality, AI society, Critical evaluation, Documentation
EDITORIAL STATUS	Structured draft v0.9

WHAT YOU WILL BE ABLE TO DO

- Use Future of work appropriately in a realistic, bounded task.
- Use Automation appropriately in a realistic, bounded task.
- Use Inequality appropriately in a realistic, bounded task.
- Use AI society appropriately in a realistic, bounded task.

WHO THIS IS FOR

Product, policy and technical learners evaluating responsible AI.

BEFORE YOU BEGIN

- No specialist background required

This open workbook is a structured draft undergoing course-specific editorial review. It does not provide certification.

COURSE MAP

From foundation to finished work

AI's Impact on Work & Society is a structured, practical course covering Future of work, Automation, Inequality, AI society. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Future of work: Ethical foundations	1. Stakeholders with Future of work 2. Harms with Automation 3. Rights with Inequality
02 Automation: Evidence	1. Bias with AI society 2. Measurement with Future of work 3. Impact with Automation
03 Inequality: Governance	1. Accountability with Inequality 2. Documentation with AI society 3. Oversight with Future of work
04 AI society: Practice	1. Risk review with Automation 2. Participation with Inequality 3. Monitoring with AI society

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable AI's Impact on Work & Society project using Future of work, Automation, Inequality.

DELIVERABLE	A working AI's Impact on Work & Society artefact plus an evidence-based self-review.
TOOLS	A suitable Future of work environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Future of work.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
