

PRACTICAL COURSE WORKBOOK

AI Productivity System

Build a responsible AI workflow for a real work task

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented prompt, verification and revision workflow
SKILLS	Notion AI, Copilot 365, AI workflow, Critical evaluation, Documentation
EDITORIAL STATUS	Structured draft v0.9

WHAT YOU WILL BE ABLE TO DO

- Use Notion AI appropriately in a realistic, bounded task.
- Use Copilot 365 appropriately in a realistic, bounded task.
- Use AI workflow appropriately in a realistic, bounded task.

WHO THIS IS FOR

People who want dependable, responsible AI-assisted workflows.

BEFORE YOU BEGIN

- Basic computer and web skills

This open workbook is a structured draft undergoing course-specific editorial review. It does not provide certification.

COURSE MAP

From foundation to finished work

AI Productivity System is a structured, practical course covering Notion AI, Copilot 365, AI workflow. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Notion AI: Foundations	1. Capabilities with Notion AI 2. Limitations with Copilot 365 3. Responsible use with AI workflow
02 Copilot 365: Working methods	1. Clear instructions with Notion AI 2. Context design with Copilot 365 3. Verification with AI workflow
03 AI workflow: Applied workflows	1. Research with Notion AI 2. Creation with Copilot 365 3. Automation with AI workflow
04 Notion AI: Quality and review	1. Evaluation with Notion AI 2. Privacy with Copilot 365 3. Repeatable practice with AI workflow

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable AI Productivity System project using Notion AI, Copilot 365, AI workflow.

DELIVERABLE	A working AI Productivity System artefact plus an evidence-based self-review.
TOOLS	A suitable Notion AI environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Notion AI.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
