

PRACTICAL COURSE WORKBOOK

Practical ChatGPT Workflows

Build a responsible AI workflow for a real work task

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented prompt, verification and revision workflow
SKILLS	ChatGPT, GPT-4o, Custom GPTs, Critical evaluation, Documentation
EDITORIAL STATUS	Structured draft v0.9

WHAT YOU WILL BE ABLE TO DO

- Use ChatGPT appropriately in a realistic, bounded task.
- Use GPT-4o appropriately in a realistic, bounded task.
- Use Custom GPTs appropriately in a realistic, bounded task.

WHO THIS IS FOR

People who want dependable, responsible AI-assisted workflows.

BEFORE YOU BEGIN

- Basic computer and web skills

This open workbook is a structured draft undergoing course-specific editorial review. It does not provide certification.

COURSE MAP

From foundation to finished work

Practical ChatGPT Workflows is a structured, practical course covering ChatGPT, GPT-4o, Custom GPTs. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 ChatGPT: Foundations	1. Capabilities with ChatGPT 2. Limitations with GPT-4o 3. Responsible use with Custom GPTs
02 GPT-4o: Working methods	1. Clear instructions with ChatGPT 2. Context design with GPT-4o 3. Verification with Custom GPTs
03 Custom GPTs: Applied workflows	1. Research with ChatGPT 2. Creation with GPT-4o 3. Automation with Custom GPTs
04 ChatGPT: Quality and review	1. Evaluation with ChatGPT 2. Privacy with GPT-4o 3. Repeatable practice with Custom GPTs

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable Practical ChatGPT Workflows project using ChatGPT, GPT-4o, Custom GPTs.

DELIVERABLE	A working Practical ChatGPT Workflows artefact plus an evidence-based self-review.
TOOLS	A suitable ChatGPT environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using ChatGPT.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
