

PRACTICAL COURSE WORKBOOK

Crypto & DeFi - No Hype Guide

Build a clearer, auditable financial workflow

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a fictional financial model with assumptions and checks
SKILLS	Bitcoin, Ethereum, DeFi, Wallets, Risk, Critical evaluation
EDITORIAL STATUS	Structured draft v0.9

WHAT YOU WILL BE ABLE TO DO

- Use Bitcoin appropriately in a realistic, bounded task.
- Use Ethereum appropriately in a realistic, bounded task.
- Use DeFi appropriately in a realistic, bounded task.
- Use Wallets appropriately in a realistic, bounded task.

WHO THIS IS FOR

Learners studying financial technology and analytical methods.

BEFORE YOU BEGIN

- Basic percentages and spreadsheet skills

This open workbook is a structured draft undergoing course-specific editorial review. It does not provide certification.

COURSE MAP

From foundation to finished work

Crypto & DeFi - No Hype Guide is a structured, practical course covering Bitcoin, Ethereum, DeFi, Wallets, Risk. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Bitcoin: Financial foundations	1. Value with Bitcoin 2. Risk with Ethereum 3. Markets with DeFi
02 Ethereum: Tools and data	1. Records with Wallets 2. Analysis with Risk 3. Controls with Bitcoin
03 DeFi: Applied decisions	1. Scenarios with Ethereum 2. Evaluation with DeFi 3. Reporting with Wallets
04 Wallets: Risk and governance	1. Security with Risk 2. Regulation with Bitcoin 3. Review with Ethereum

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable Crypto & DeFi - No Hype Guide project using Bitcoin, Ethereum, DeFi.

DELIVERABLE	A working Crypto & DeFi - No Hype Guide artefact plus an evidence-based self-review.
TOOLS	A suitable Bitcoin environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Bitcoin.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

RESPONSIBLE PRACTICE

This course is general education, not financial, investment, tax or legal advice.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
