

PRACTICAL COURSE WORKBOOK

AI Video: Sora & RunwayML

Build a responsible AI workflow for a real work task

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented prompt, verification and revision workflow
SKILLS	Sora, RunwayML, HeyGen, Critical evaluation, Documentation
EDITORIAL STATUS	Structured draft v0.9

WHAT YOU WILL BE ABLE TO DO

- Use Sora appropriately in a realistic, bounded task.
- Use RunwayML appropriately in a realistic, bounded task.
- Use HeyGen appropriately in a realistic, bounded task.

WHO THIS IS FOR

People who want dependable, responsible AI-assisted workflows.

BEFORE YOU BEGIN

- Basic computer and web skills

This open workbook is a structured draft undergoing course-specific editorial review. It does not provide certification.

COURSE MAP

From foundation to finished work

AI Video: Sora & RunwayML is a structured, practical course covering Sora, RunwayML, HeyGen. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Sora: Foundations	1. Capabilities with Sora 2. Limitations with RunwayML 3. Responsible use with HeyGen
02 RunwayML: Working methods	1. Clear instructions with Sora 2. Context design with RunwayML 3. Verification with HeyGen
03 HeyGen: Applied workflows	1. Research with Sora 2. Creation with RunwayML 3. Automation with HeyGen
04 Sora: Quality and review	1. Evaluation with Sora 2. Privacy with RunwayML 3. Repeatable practice with HeyGen

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable AI Video: Sora & RunwayML project using Sora, RunwayML, HeyGen.

DELIVERABLE	A working AI Video: Sora & RunwayML artefact plus an evidence-based self-review.
TOOLS	A suitable Sora environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Sora.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
