

PRACTICAL COURSE WORKBOOK

AI Productivity System

Build a responsible AI workflow for a real work task

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented prompt, verification and revision workflow
SKILLS	Notion AI, Copilot 365, AI workflow, Critical evaluation, Documentation
EDITION	Structured draft - version 0.9

WHAT YOU WILL BE ABLE TO DO

- Use Notion AI appropriately in a realistic, bounded task.
- Use Copilot 365 appropriately in a realistic, bounded task.
- Use AI workflow appropriately in a realistic, bounded task.

WHO THIS IS FOR

People who want dependable, responsible AI-assisted workflows.

BEFORE YOU BEGIN

- Basic computer and web skills

Use this workbook with the online lessons. It is designed for A4 printing, handwritten evidence notes, and offline revision. It does not provide certification.

WORKBOOK GUIDE

A clear route through the course

AI Productivity System is a structured, practical course covering Notion AI, Copilot 365, AI workflow. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Notion AI: Foundations	1. Capabilities with Notion AI 2. Limitations with Copilot 365 3. Responsible use with AI workflow
02 Copilot 365: Working methods	1. Clear instructions with Notion AI 2. Context design with Copilot 365 3. Verification with AI workflow
03 AI workflow: Applied workflows	1. Research with Notion AI 2. Creation with Copilot 365 3. Automation with AI workflow
04 Notion AI: Quality and review	1. Evaluation with Notion AI 2. Privacy with Copilot 365 3. Repeatable practice with AI workflow

HOW TO USE EACH LESSON PAGE

- 1 Read the objective and identify the decision it supports.
- 2 Attempt the retrieval prompt before checking the online explanation.
- 3 Reproduce the worked example with the stated input.
- 4 Test one normal case and one boundary or failure case.
- 5 Record the result, limitation and next action in the evidence log.

PRINT AND FILE

Print at 100% scale on A4 paper. Use double-sided printing with long-edge binding. Keep completed pages with the project files named in the evidence log.

MODULE 01

Notion AI: Foundations

Apply Notion AI through capabilities, limitations, responsible use.

LESSON 01 / 18 MIN

Capabilities with Notion AI

Learning objectives

- Explain capabilities in the context of AI Productivity System.
- Apply Notion AI to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

capabilities, Notion AI, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a capabilities result produced with Notion AI?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

LESSON 02 / 22 MIN

Limitations with Copilot 365

Learning objectives

- Explain limitations in the context of AI Productivity System.
- Apply Copilot 365 to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

limitations, Copilot 365, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a limitations result produced with Copilot 365?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

LESSON 03 / 26 MIN

Responsible use with AI workflow

Learning objectives

- Explain responsible use in the context of AI Productivity System.
- Apply AI workflow to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

responsible use, AI workflow, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a responsible use result produced with AI workflow?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 02

Copilot 365: Working methods

Apply Copilot 365 through clear instructions, context design, verification.

LESSON 04 / 30 MIN

Clear instructions with Notion AI

Learning objectives

- Explain clear instructions in the context of AI Productivity System.
- Apply Notion AI to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

clear instructions, Notion AI, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a clear instructions result produced with Notion AI?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

LESSON 05 / 18 MIN

Context design with Copilot 365

Learning objectives

- Explain context design in the context of AI Productivity System.
- Apply Copilot 365 to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

context design, Copilot 365, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a context design result produced with Copilot 365?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

LESSON 06 / 22 MIN

Verification with AI workflow

Learning objectives

- Explain verification in the context of AI Productivity System.
- Apply AI workflow to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

verification, AI workflow, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a verification result produced with AI workflow?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 03

AI workflow: Applied workflows

Apply AI workflow through research, creation, automation.

LESSON 07 / 26 MIN

Research with Notion AI

Learning objectives

- Explain research in the context of AI Productivity System.
- Apply Notion AI to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

research, Notion AI, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a research result produced with Notion AI?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 08 / 30 MIN

Creation with Copilot 365

Learning objectives

- Explain creation in the context of AI Productivity System.
- Apply Copilot 365 to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

creation, Copilot 365, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a creation result produced with Copilot 365?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 09 / 18 MIN

Automation with AI workflow

Learning objectives

- Explain automation in the context of AI Productivity System.
- Apply AI workflow to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

automation, AI workflow, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a automation result produced with AI workflow?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 04

Notion AI: Quality and review

Apply Notion AI through evaluation, privacy, repeatable practice.

LESSON 10 / 22 MIN

Evaluation with Notion AI

Learning objectives

- Explain evaluation in the context of AI Productivity System.
- Apply Notion AI to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

evaluation, Notion AI, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a evaluation result produced with Notion AI?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 11 / 26 MIN

Privacy with Copilot 365

Learning objectives

- Explain privacy in the context of AI Productivity System.
- Apply Copilot 365 to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

privacy, Copilot 365, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a privacy result produced with Copilot 365?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 12 / 30 MIN

Repeatable practice with AI workflow

Learning objectives

- Explain repeatable practice in the context of AI Productivity System.
- Apply AI workflow to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

repeatable practice, AI workflow, ai-tools

Retrieval prompt

In AI Productivity System, which evidence best supports a repeatable practice result produced with AI workflow?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

CAPSTONE PROJECT

Produce a reviewable AI Productivity System project using Notion AI, Copilot 365, AI workflow.

DELIVERABLE	A working AI Productivity System artefact plus an evidence-based self-review.
TOOLS	A suitable Notion AI environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Notion AI.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

PROJECT EVIDENCE

Document decisions another person can review

1. PURPOSE AND USER
State the intended user, need, expected outcome and constraints.

2. INPUTS AND ASSUMPTIONS
List source files, data, versions, permissions and assumptions.

PROJECT EVIDENCE

Tests, limitations and revision

3. NORMAL CASE

Expected result, observed result and evidence location.

4. BOUNDARY OR FAILURE CASE

What was difficult, what happened and why it matters.

5. REVISION AND LIMITATION

What changed, what improved and what remains unproven.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?

FINAL DECISION

Is the project ready to share? State the evidence, remaining risk, owner and next review date.
