

PRACTICAL COURSE WORKBOOK

Digital Government & e-Services

Use evidence to explain a public-interest problem

LEVEL	Intermediate
GUIDED TIME	5 hours across 12 lessons
PROJECT	an evidence brief with a reproducible analysis
SKILLS	e-Government, Digital ID, GovTech, Open source, APIs, Critical evaluation
EDITION	Structured draft - version 0.9

WHAT YOU WILL BE ABLE TO DO

- Use e-Government appropriately in a realistic, bounded task.
- Use Digital ID appropriately in a realistic, bounded task.
- Use GovTech appropriately in a realistic, bounded task.
- Use Open source appropriately in a realistic, bounded task.

WHO THIS IS FOR

Public-interest learners using evidence and technology responsibly.

BEFORE YOU BEGIN

- Basic research and spreadsheet skills

Use this workbook with the online lessons. It is designed for A4 printing, handwritten evidence notes, and offline revision. It does not provide certification.

WORKBOOK GUIDE

A clear route through the course

Digital Government & e-Services is a structured, practical course covering e-Government, Digital ID, GovTech, Open source, APIs. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 e-Government: Public problems	1. Stakeholders with e-Government 2. Institutions with Digital ID 3. Evidence with GovTech
02 Digital ID: Digital methods	1. Open data with Open source 2. Services with APIs 3. Participation with e-Government
03 GovTech: Policy design	1. Options with Digital ID 2. Impact with GovTech 3. Implementation with Open source
04 Open source: Accountability	1. Measurement with APIs 2. Transparency with e-Government 3. Maintenance with Digital ID

HOW TO USE EACH LESSON PAGE

- 1 Read the objective and identify the decision it supports.
- 2 Attempt the retrieval prompt before checking the online explanation.
- 3 Reproduce the worked example with the stated input.
- 4 Test one normal case and one boundary or failure case.
- 5 Record the result, limitation and next action in the evidence log.

PRINT AND FILE

Print at 100% scale on A4 paper. Use double-sided printing with long-edge binding. Keep completed pages with the project files named in the evidence log.

MODULE 01

e-Government: Public problems

Apply e-Government through stakeholders, institutions, evidence.

LESSON 01 / 18 MIN

Stakeholders with e-Government

Learning objectives

- Explain stakeholders in the context of Digital Government & e-Services.
- Apply e-Government to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

stakeholders, e-Government, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a stakeholders result produced with e-Government?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 02 / 22 MIN

Institutions with Digital ID

Learning objectives

- Explain institutions in the context of Digital Government & e-Services.
- Apply Digital ID to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

institutions, Digital ID, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a institutions result produced with Digital ID?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 03 / 26 MIN

Evidence with GovTech

Learning objectives

- Explain evidence in the context of Digital Government & e-Services.
- Apply GovTech to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

evidence, GovTech, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a evidence result produced with GovTech?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 02

Digital ID: Digital methods

Apply Digital ID through open data, services, participation.

LESSON 04 / 30 MIN

Open data with Open source

Learning objectives

- Explain open data in the context of Digital Government & e-Services.
- Apply Open source to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

open data, Open source, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a open data result produced with Open source?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 05 / 18 MIN

Services with APIs

Learning objectives

- Explain services in the context of Digital Government & e-Services.
- Apply APIs to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

services, APIs, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a services result produced with APIs?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 06 / 22 MIN

Participation with e-Government

Learning objectives

- Explain participation in the context of Digital Government & e-Services.
- Apply e-Government to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

participation, e-Government, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a participation result produced with e-Government?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 03

GovTech: Policy design

Apply GovTech through options, impact, implementation.

LESSON 07 / 26 MIN

Options with Digital ID

Learning objectives

- Explain options in the context of Digital Government & e-Services.
- Apply Digital ID to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

options, Digital ID, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a options result produced with Digital ID?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 08 / 30 MIN

Impact with GovTech

Learning objectives

- Explain impact in the context of Digital Government & e-Services.
- Apply GovTech to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

impact, GovTech, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a impact result produced with GovTech?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 09 / 18 MIN

Implementation with Open source

Learning objectives

- Explain implementation in the context of Digital Government & e-Services.
- Apply Open source to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

implementation, Open source, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a implementation result produced with Open source?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 04

Open source: Accountability

Apply Open source through measurement, transparency, maintenance.

LESSON 10 / 22 MIN

Measurement with APIs

Learning objectives

- Explain measurement in the context of Digital Government & e-Services.
- Apply APIs to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

measurement, APIs, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a measurement result produced with APIs?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 11 / 26 MIN

Transparency with e-Government

Learning objectives

- Explain transparency in the context of Digital Government & e-Services.
- Apply e-Government to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

transparency, e-Government, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a transparency result produced with e-Government?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 12 / 30 MIN

Maintenance with Digital ID

Learning objectives

- Explain maintenance in the context of Digital Government & e-Services.
- Apply Digital ID to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

maintenance, Digital ID, policy

Retrieval prompt

In Digital Government & e-Services, which evidence best supports a maintenance result produced with Digital ID?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

CAPSTONE PROJECT

Produce a reviewable Digital Government & e-Services project using e-Government, Digital ID, GovTech.

DELIVERABLE	A working Digital Government & e-Services artefact plus an evidence-based self-review.
TOOLS	A suitable e-Government environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using e-Government.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

PROJECT EVIDENCE

Document decisions another person can review

1. PURPOSE AND USER
State the intended user, need, expected outcome and constraints.

2. INPUTS AND ASSUMPTIONS
List source files, data, versions, permissions and assumptions.

PROJECT EVIDENCE

Tests, limitations and revision

3. NORMAL CASE

Expected result, observed result and evidence location.

4. BOUNDARY OR FAILURE CASE

What was difficult, what happened and why it matters.

5. REVISION AND LIMITATION

What changed, what improved and what remains unproven.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?

FINAL DECISION

Is the project ready to share? State the evidence, remaining risk, owner and next review date.
