

## PRACTICAL COURSE WORKBOOK

# E-Commerce with AI Tools

Develop a service or business process you can explain clearly

|             |                                                                              |
|-------------|------------------------------------------------------------------------------|
| LEVEL       | Beginner                                                                     |
| GUIDED TIME | 5 hours across 12 lessons                                                    |
| PROJECT     | a client-ready brief, plan and evidence pack                                 |
| SKILLS      | Shopify, Dropshipping, AI ads, Analytics, Critical evaluation, Documentation |
| EDITION     | Structured draft - version 0.9                                               |

## WHAT YOU WILL BE ABLE TO DO

- Use Shopify appropriately in a realistic, bounded task.
- Use Dropshipping appropriately in a realistic, bounded task.
- Use AI ads appropriately in a realistic, bounded task.
- Use Analytics appropriately in a realistic, bounded task.

## WHO THIS IS FOR

People developing evidence-based digital products and services.

## BEFORE YOU BEGIN

- A problem area or customer group to investigate

---

Use this workbook with the online lessons. It is designed for A4 printing, handwritten evidence notes, and offline revision. It does not provide certification.

## WORKBOOK GUIDE

# A clear route through the course

E-Commerce with AI Tools is a structured, practical course covering Shopify, Dropshipping, AI ads, Analytics. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

| MODULE                                  | LESSONS AND FOCUS                                                                                |
|-----------------------------------------|--------------------------------------------------------------------------------------------------|
| <b>01 Shopify: Customer evidence</b>    | 1. Problem discovery with Shopify<br>2. Research with Dropshipping<br>3. Positioning with AI ads |
| <b>02 Dropshipping: Offer design</b>    | 1. Scope with Analytics<br>2. Value with Shopify<br>3. Pricing with Dropshipping                 |
| <b>03 AI ads: Delivery</b>              | 1. Operations with AI ads<br>2. Quality with Analytics<br>3. Finance with Shopify                |
| <b>04 Analytics: Sustainable growth</b> | 1. Measurement with Dropshipping<br>2. Retention with AI ads<br>3. Risk with Analytics           |

## HOW TO USE EACH LESSON PAGE

- 1 Read the objective and identify the decision it supports.
- 2 Attempt the retrieval prompt before checking the online explanation.
- 3 Reproduce the worked example with the stated input.
- 4 Test one normal case and one boundary or failure case.
- 5 Record the result, limitation and next action in the evidence log.

## PRINT AND FILE

Print at 100% scale on A4 paper. Use double-sided printing with long-edge binding. Keep completed pages with the project files named in the evidence log.

## MODULE 01

# Shopify: Customer evidence

Apply Shopify through problem discovery, research, positioning.

## LESSON 01 / 18 MIN

## Problem discovery with Shopify

### Learning objectives

- Explain problem discovery in the context of E-Commerce with AI Tools.
- Apply Shopify to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

problem discovery, Shopify, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a problem discovery result produced with Shopify?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 02 / 22 MIN

## Research with Dropshipping

### Learning objectives

- Explain research in the context of E-Commerce with AI Tools.
- Apply Dropshipping to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

research, Dropshipping, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a research result produced with Dropshipping?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 03 / 26 MIN

## Positioning with AI ads

### Learning objectives

- Explain positioning in the context of E-Commerce with AI Tools.
- Apply AI ads to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

positioning, AI ads, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a positioning result produced with AI ads?

**Evidence to keep**

[ ] Original input [ ] Observed result [ ] Boundary or failure result [ ] Limitation and next action

## MODULE REVIEW

# Turn the module into usable evidence

**1. RETRIEVE**

Without checking the lessons, explain the module's three most important ideas in your own words.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

**2. APPLY**

Describe the example or file you produced, the input used, and the result you observed.

|  |
|--|
|  |
|  |
|  |
|  |
|  |
|  |
|  |

**3. REVIEW**

Record one uncertainty, one source to recheck, and the next deliberate practice action.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

## MODULE 02

# Dropshipping: Offer design

Apply Dropshipping through scope, value, pricing.

## LESSON 04 / 30 MIN

## Scope with Analytics

### Learning objectives

- Explain scope in the context of E-Commerce with AI Tools.
- Apply Analytics to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

scope, Analytics, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a scope result produced with Analytics?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 05 / 18 MIN

## Value with Shopify

### Learning objectives

- Explain value in the context of E-Commerce with AI Tools.
- Apply Shopify to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

value, Shopify, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a value result produced with Shopify?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 06 / 22 MIN

## Pricing with Dropshipping

### Learning objectives

- Explain pricing in the context of E-Commerce with AI Tools.
- Apply Dropshipping to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

pricing, Dropshipping, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a pricing result produced with Dropshipping?

**Evidence to keep**

[ ] Original input [ ] Observed result [ ] Boundary or failure result [ ] Limitation and next action

## MODULE REVIEW

# Turn the module into usable evidence

**1. RETRIEVE**

Without checking the lessons, explain the module's three most important ideas in your own words.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

**2. APPLY**

Describe the example or file you produced, the input used, and the result you observed.

|  |
|--|
|  |
|  |
|  |
|  |
|  |
|  |
|  |

**3. REVIEW**

Record one uncertainty, one source to recheck, and the next deliberate practice action.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

## MODULE 03

# AI ads: Delivery

Apply AI ads through operations, quality, finance.

## LESSON 07 / 26 MIN

## Operations with AI ads

### Learning objectives

- Explain operations in the context of E-Commerce with AI Tools.
- Apply AI ads to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

operations, AI ads, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a operations result produced with AI ads?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 08 / 30 MIN

## Quality with Analytics

### Learning objectives

- Explain quality in the context of E-Commerce with AI Tools.
- Apply Analytics to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

quality, Analytics, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a quality result produced with Analytics?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 09 / 18 MIN

## Finance with Shopify

### Learning objectives

- Explain finance in the context of E-Commerce with AI Tools.
- Apply Shopify to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

finance, Shopify, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a finance result produced with Shopify?

**Evidence to keep**

[ ] Original input [ ] Observed result [ ] Boundary or failure result [ ] Limitation and next action

## MODULE REVIEW

# Turn the module into usable evidence

**1. RETRIEVE**

Without checking the lessons, explain the module's three most important ideas in your own words.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

**2. APPLY**

Describe the example or file you produced, the input used, and the result you observed.

|  |
|--|
|  |
|  |
|  |
|  |
|  |
|  |
|  |

**3. REVIEW**

Record one uncertainty, one source to recheck, and the next deliberate practice action.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

## MODULE 04

# Analytics: Sustainable growth

Apply Analytics through measurement, retention, risk.

## LESSON 10 / 22 MIN

## Measurement with Dropshipping

### Learning objectives

- Explain measurement in the context of E-Commerce with AI Tools.
- Apply Dropshipping to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

measurement, Dropshipping, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a measurement result produced with Dropshipping?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 11 / 26 MIN

## Retention with AI ads

### Learning objectives

- Explain retention in the context of E-Commerce with AI Tools.
- Apply AI ads to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

retention, AI ads, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a retention result produced with AI ads?

### Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

## LESSON 12 / 30 MIN

## Risk with Analytics

### Learning objectives

- Explain risk in the context of E-Commerce with AI Tools.
- Apply Analytics to a bounded practical task.
- Evaluate the result using explicit quality criteria.

### Key terms

risk, Analytics, business

### Retrieval prompt

In E-Commerce with AI Tools, which evidence best supports a risk result produced with Analytics?

**Evidence to keep**

[ ] Original input [ ] Observed result [ ] Boundary or failure result [ ] Limitation and next action

## MODULE REVIEW

# Turn the module into usable evidence

**1. RETRIEVE**

Without checking the lessons, explain the module's three most important ideas in your own words.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

**2. APPLY**

Describe the example or file you produced, the input used, and the result you observed.

|  |
|--|
|  |
|  |
|  |
|  |
|  |
|  |
|  |

**3. REVIEW**

Record one uncertainty, one source to recheck, and the next deliberate practice action.

|  |
|--|
|  |
|  |
|  |
|  |
|  |

## CAPSTONE PROJECT

# Produce a reviewable E-Commerce with AI Tools project using Shopify, Dropshipping, AI ads.

|             |                                                                                                   |
|-------------|---------------------------------------------------------------------------------------------------|
| DELIVERABLE | A working E-Commerce with AI Tools artefact plus an evidence-based self-review.                   |
| TOOLS       | A suitable Shopify environment, A plain-text decision log, Test data or realistic sample material |

## Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Shopify.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

## Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

## PROJECT EVIDENCE

# Document decisions another person can review

**1. PURPOSE AND USER**

State the intended user, need, expected outcome and constraints.

**2. INPUTS AND ASSUMPTIONS**

List source files, data, versions, permissions and assumptions.

## PROJECT EVIDENCE

# Tests, limitations and revision

**3. NORMAL CASE**

Expected result, observed result and evidence location.

**4. BOUNDARY OR FAILURE CASE**

What was difficult, what happened and why it matters.

**5. REVISION AND LIMITATION**

What changed, what improved and what remains unproven.

## REVIEW AND SOURCES

# Make the work credible and repeatable

## Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?

**FINAL DECISION**

Is the project ready to share? State the evidence, remaining risk, owner and next review date.
