

PRACTICAL COURSE WORKBOOK

Node.js & REST APIs

Build and test a responsive digital product

LEVEL	Intermediate
GUIDED TIME	5 hours across 12 lessons
PROJECT	a responsive, accessible application you can demonstrate
SKILLS	Node, Express, REST, JWT, Critical evaluation, Documentation
EDITION	Structured draft - version 0.9

WHAT YOU WILL BE ABLE TO DO

- Use Node appropriately in a realistic, bounded task.
- Use Express appropriately in a realistic, bounded task.
- Use REST appropriately in a realistic, bounded task.
- Use JWT appropriately in a realistic, bounded task.

WHO THIS IS FOR

Learners building accessible, maintainable web products.

BEFORE YOU BEGIN

- Comfort using a browser and text editor

Use this workbook with the online lessons. It is designed for A4 printing, handwritten evidence notes, and offline revision. It does not provide certification.

WORKBOOK GUIDE

A clear route through the course

Node.js & REST APIs is a structured, practical course covering Node, Express, REST, JWT. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Node: Web foundations	1. Standards with Node 2. Structure with Express 3. Developer tools with REST
02 Express: Core implementation	1. Components with JWT 2. State and data with Node 3. Responsive layout with Express
03 REST: Quality	1. Accessibility with REST 2. Testing with JWT 3. Performance with Node
04 JWT: Production practice	1. Security with Express 2. Deployment with REST 3. Maintenance with JWT

HOW TO USE EACH LESSON PAGE

- 1 Read the objective and identify the decision it supports.
- 2 Attempt the retrieval prompt before checking the online explanation.
- 3 Reproduce the worked example with the stated input.
- 4 Test one normal case and one boundary or failure case.
- 5 Record the result, limitation and next action in the evidence log.

PRINT AND FILE

Print at 100% scale on A4 paper. Use double-sided printing with long-edge binding. Keep completed pages with the project files named in the evidence log.

MODULE 01

Node: Web foundations

Apply Node through standards, structure, developer tools.

LESSON 01 / 18 MIN

Standards with Node

Learning objectives

- Explain standards in the context of Node.js & REST APIs.
- Apply Node to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

standards, Node, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a standards result produced with Node?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 02 / 22 MIN

Structure with Express

Learning objectives

- Explain structure in the context of Node.js & REST APIs.
- Apply Express to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

structure, Express, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a structure result produced with Express?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 03 / 26 MIN

Developer tools with REST

Learning objectives

- Explain developer tools in the context of Node.js & REST APIs.
- Apply REST to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

developer tools, REST, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a developer tools result produced with REST?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 02

Express: Core implementation

Apply Express through components, state and data, responsive layout.

LESSON 04 / 30 MIN

Components with JWT

Learning objectives

- Explain components in the context of Node.js & REST APIs.
- Apply JWT to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

components, JWT, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a components result produced with JWT?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 05 / 18 MIN

State and data with Node

Learning objectives

- Explain state and data in the context of Node.js & REST APIs.
- Apply Node to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

state and data, Node, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a state and data result produced with Node?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 06 / 22 MIN

Responsive layout with Express

Learning objectives

- Explain responsive layout in the context of Node.js & REST APIs.
- Apply Express to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

responsive layout, Express, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a responsive layout result produced with Express?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 03

REST: Quality

Apply REST through accessibility, testing, performance.

LESSON 07 / 26 MIN

Accessibility with REST

Learning objectives

- Explain accessibility in the context of Node.js & REST APIs.
- Apply REST to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

accessibility, REST, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a accessibility result produced with REST?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 08 / 30 MIN

Testing with JWT

Learning objectives

- Explain testing in the context of Node.js & REST APIs.
- Apply JWT to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

testing, JWT, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a testing result produced with JWT?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 09 / 18 MIN

Performance with Node

Learning objectives

- Explain performance in the context of Node.js & REST APIs.
- Apply Node to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

performance, Node, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a performance result produced with Node?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

MODULE 04

JWT: Production practice

Apply JWT through security, deployment, maintenance.

LESSON 10 / 22 MIN

Security with Express

Learning objectives

- Explain security in the context of Node.js & REST APIs.
- Apply Express to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

security, Express, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a security result produced with Express?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 11 / 26 MIN

Deployment with REST

Learning objectives

- Explain deployment in the context of Node.js & REST APIs.
- Apply REST to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

deployment, REST, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a deployment result produced with REST?

Evidence to keep

☐ Original input ☐ Observed result ☐ Boundary or failure result ☐ Limitation and next action

LESSON 12 / 30 MIN

Maintenance with JWT

Learning objectives

- Explain maintenance in the context of Node.js & REST APIs.
- Apply JWT to a bounded practical task.
- Evaluate the result using explicit quality criteria.

Key terms

maintenance, JWT, webdev

Retrieval prompt

In Node.js & REST APIs, which evidence best supports a maintenance result produced with JWT?

Evidence to keep

[] Original input [] Observed result [] Boundary or failure result [] Limitation and next action

MODULE REVIEW

Turn the module into usable evidence

1. RETRIEVE

Without checking the lessons, explain the module's three most important ideas in your own words.

2. APPLY

Describe the example or file you produced, the input used, and the result you observed.

3. REVIEW

Record one uncertainty, one source to recheck, and the next deliberate practice action.

CAPSTONE PROJECT

Produce a reviewable Node.js & REST APIs project using Node, Express, REST.

DELIVERABLE	A working Node.js & REST APIs artefact plus an evidence-based self-review.
TOOLS	A suitable Node environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Node.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

PROJECT EVIDENCE

Document decisions another person can review

1. PURPOSE AND USER

State the intended user, need, expected outcome and constraints.

2. INPUTS AND ASSUMPTIONS

List source files, data, versions, permissions and assumptions.

PROJECT EVIDENCE

Tests, limitations and revision

3. NORMAL CASE

Expected result, observed result and evidence location.

4. BOUNDARY OR FAILURE CASE

What was difficult, what happened and why it matters.

5. REVISION AND LIMITATION

What changed, what improved and what remains unproven.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?

FINAL DECISION

Is the project ready to share? State the evidence, remaining risk, owner and next review date.
