

PRACTICAL COURSE WORKBOOK

AI Law, Policy & Regulation

Evaluate technology decisions with evidence and accountability

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented risk and impact assessment
SKILLS	EU AI Act, GDPR, Policy, Compliance, Governance, Critical evaluation
REVIEWED	2026-08-25

WHAT YOU WILL BE ABLE TO DO

- Use EU AI Act appropriately in a realistic, bounded task.
- Use GDPR appropriately in a realistic, bounded task.
- Use Policy appropriately in a realistic, bounded task.
- Use Compliance appropriately in a realistic, bounded task.

WHO THIS IS FOR

Product, policy and technical learners evaluating responsible AI.

BEFORE YOU BEGIN

- No specialist background required

Use this guide beside the interactive lessons. Keep inputs, decisions, tests, limitations and the next improvement.

COURSE MAP

From foundation to finished work

AI Law, Policy & Regulation is a structured, practical course covering EU AI Act, GDPR, Policy, Compliance, Governance. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Ethical foundations	1. Stakeholders with EU AI Act 2. Harms with GDPR 3. Rights with Policy
02 Evidence	1. Bias with Compliance 2. Measurement with Governance 3. Impact with EU AI Act
03 Governance	1. Accountability with GDPR 2. Documentation with Policy 3. Oversight with Compliance
04 Practice	1. Risk review with Governance 2. Participation with EU AI Act 3. Monitoring with GDPR

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable AI Law, Policy & Regulation project using EU AI Act, GDPR, Policy.

DELIVERABLE	A working AI Law, Policy & Regulation artefact plus an evidence-based self-review.
TOOLS	A suitable EU AI Act environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using EU AI Act.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
