

PRACTICAL COURSE WORKBOOK

Civic Tech - Technology for Public Good

Use evidence to explain a public-interest problem

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	an evidence brief with a reproducible analysis
SKILLS	Civic tech, Open data, Government, Digital services, APIs, Critical evaluation
REVIEWED	2026-08-25

WHAT YOU WILL BE ABLE TO DO

- Use Civic tech appropriately in a realistic, bounded task.
- Use Open data appropriately in a realistic, bounded task.
- Use Government appropriately in a realistic, bounded task.
- Use Digital services appropriately in a realistic, bounded task.

WHO THIS IS FOR

Public-interest learners using evidence and technology responsibly.

BEFORE YOU BEGIN

- Basic research and spreadsheet skills

Use this guide beside the interactive lessons. Keep inputs, decisions, tests, limitations and the next improvement.

COURSE MAP

From foundation to finished work

Civic Tech - Technology for Public Good is a structured, practical course covering Civic tech, Open data, Government, Digital services, APIs. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Public problems	1. Stakeholders with Civic tech 2. Institutions with Open data 3. Evidence with Government
02 Digital methods	1. Open data with Digital services 2. Services with APIs 3. Participation with Civic tech
03 Policy design	1. Options with Open data 2. Impact with Government 3. Implementation with Digital services
04 Accountability	1. Measurement with APIs 2. Transparency with Civic tech 3. Maintenance with Open data

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable Civic Tech - Technology for Public Good project using Civic tech, Open data, Government.

DELIVERABLE	A working Civic Tech - Technology for Public Good artefact plus an evidence-based self-review.
TOOLS	A suitable Civic tech environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Civic tech.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
