

PRACTICAL COURSE WORKBOOK

Data Privacy & Digital Rights

Evaluate technology decisions with evidence and accountability

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a documented risk and impact assessment
SKILLS	Privacy, GDPR, Digital Rights, Surveillance, Consent, Critical evaluation
REVIEWED	2026-08-25

WHAT YOU WILL BE ABLE TO DO

- Use Privacy appropriately in a realistic, bounded task.
- Use GDPR appropriately in a realistic, bounded task.
- Use Digital Rights appropriately in a realistic, bounded task.
- Use Surveillance appropriately in a realistic, bounded task.

WHO THIS IS FOR

Product, policy and technical learners evaluating responsible AI.

BEFORE YOU BEGIN

- No specialist background required

Use this guide beside the interactive lessons. Keep inputs, decisions, tests, limitations and the next improvement.

COURSE MAP

From foundation to finished work

Data Privacy & Digital Rights is a structured, practical course covering Privacy, GDPR, Digital Rights, Surveillance, Consent. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Ethical foundations	1. Stakeholders with Privacy 2. Harms with GDPR 3. Rights with Digital Rights
02 Evidence	1. Bias with Surveillance 2. Measurement with Consent 3. Impact with Privacy
03 Governance	1. Accountability with GDPR 2. Documentation with Digital Rights 3. Oversight with Surveillance
04 Practice	1. Risk review with Consent 2. Participation with Privacy 3. Monitoring with GDPR

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable Data Privacy & Digital Rights project using Privacy, GDPR, Digital Rights.

DELIVERABLE	A working Data Privacy & Digital Rights artefact plus an evidence-based self-review.
TOOLS	A suitable Privacy environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using Privacy.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
