

PRACTICAL COURSE WORKBOOK

HTML & CSS Mastery

Build and test a responsive digital product

LEVEL	Beginner
GUIDED TIME	5 hours across 12 lessons
PROJECT	a responsive, accessible application you can demonstrate
SKILLS	HTML, CSS, Flexbox, Grid, Critical evaluation, Documentation
REVIEWED	2026-08-25

WHAT YOU WILL BE ABLE TO DO

- Use HTML appropriately in a realistic, bounded task.
- Use CSS appropriately in a realistic, bounded task.
- Use Flexbox appropriately in a realistic, bounded task.
- Use Grid appropriately in a realistic, bounded task.

WHO THIS IS FOR

Learners building accessible, maintainable web products.

BEFORE YOU BEGIN

- Comfort using a browser and text editor

Use this guide beside the interactive lessons. Keep inputs, decisions, tests, limitations and the next improvement.

COURSE MAP

From foundation to finished work

HTML & CSS Mastery is a structured, practical course covering HTML, CSS, Flexbox, Grid. It emphasizes explainable methods, checked work and a final outcome that can be reviewed.

MODULE	LESSONS AND FOCUS
01 Web foundations	1. Standards with HTML 2. Structure with CSS 3. Developer tools with Flexbox
02 Core implementation	1. Components with Grid 2. State and data with HTML 3. Responsive layout with CSS
03 Quality	1. Accessibility with Flexbox 2. Testing with Grid 3. Performance with HTML
04 Production practice	1. Security with CSS 2. Deployment with Flexbox 3. Maintenance with Grid

HOW TO STUDY EACH LESSON

- 1 Read the objective and identify the decision it supports.
- 2 Reproduce the worked example with the stated input.
- 3 Test one normal case and one boundary or failure case.
- 4 Complete the knowledge check without guessing.
- 5 Save a short evidence note: result, limitation and next action.

CAPSTONE PROJECT

Produce a reviewable HTML & CSS Mastery project using HTML, CSS, Flexbox.

DELIVERABLE	A working HTML & CSS Mastery artefact plus an evidence-based self-review.
TOOLS	A suitable HTML environment, A plain-text decision log, Test data or realistic sample material

Production plan

- 1 Define the intended user, outcome and constraints.
- 2 Create the smallest complete result using HTML.
- 3 Test one normal case, one boundary case and one failure response.
- 4 Revise the work from the evidence and preserve before-and-after results.
- 5 Prepare a concise handover containing method, limitations and next step.

Definition of done

- The output matches the stated outcome.
- Inputs and decisions are reproducible.
- Boundary and failure evidence is included.
- Limitations and responsibility considerations are explicit.

Evidence log

INPUT	Original brief, data, requirements or test material.
DECISIONS	Chosen method and one reasonable alternative.
TESTS	Normal, boundary and failure results.
LIMITATION	What the result does not establish.
REVISION	One evidence-led improvement.

REVIEW AND SOURCES

Make the work credible and repeatable

Final self-review

- Can another learner repeat the method?
- Did I test a difficult case?
- Did I avoid unsupported claims?
- Is the next action proportionate to the remaining risk?
